i personally think that xm radio should be able to continue with weather and traffic updates. this is a good safety factor for the trucker. it allows us to be able to plan our routes safely and with fewer delays. it helps us to avoid accidents, construction and bad weather. it is also nice to be able to know the station you can turn to for this information. traveling in new towns gets frustrating to those who need to know this info but dont know the station to listen to. again i think that xm radio is a big asset to the trucking industry as well as other industries.

respectfully, mike
